

## Analyse and manage complex marine environmental data easily and efficiently with SeaZone GeoTemporal

Ref : SZGTEV2DEC09

Dear Sir / Madame

SeaZone would like to keep you informed of the latest news of its marine environmental data analysis and management and software, **GeoTemporal Editor**, following its successful launch at Ocean Business '09.

A new version of SeaZone GeoTemporal Editor was released at the beginning of November 2009 and now includes all of the spatial analysis capability of its previous version, plus many more beneficial features. As a consequence, SeaZone announces the withdrawal of support and maintenance of version 1 of the software (also known as 'ADCP Processing') from 1 April 2010.

SeaZone is encouraging all users of previous versions to sign up to the latest version of the software as soon as possible and is offering some great deals as an incentive for existing and new users:

- Free upgrade to the latest software for all version 1 licensees with support and maintenance in place (£750) when taken out before 31 March 2010.
- Three month trial evaluation for £225 and 1 days' training for £850, fully redeemable against price of the software when purchased before 31 March 2010
- Free training (worth £850) when software is purchased in full before 31 March 2010

Please contact Robin Coackley or Litan Paul, SeaZone Sales Consultants and quote the reference above for further details, arrange a demonstration or to order an evaluation.

GeoTemporal Editor Product Brochure and Customer Case Study from Titan Surveys are attached for further information.

### **SEAZONE GEOTEMPORAL EDITOR VERSION 2.0.3 PRICING**

- **Software Purchase**  
GeoTemporal Editor (version 2.0.3.69)
